Notes:

- You can lay out your badge directly in the art boards above.
- We can only accomodate up to 40% ink coverage on seed paper to conserve seed viability and avoid warping.
- This seeded badge is die-cut with three slots (by default)
- Vector artwork will provide the best print quality
- Raster artwork should be < 300dpi
- Be sure to include dynamic text boxes so we know what font style, size and weight you would like.
  (We will always default to arial or a font that works with your spreadsheet)
- Include any font files you would like used for your design when submitting your order
- Make sure to outline any non-variable text
- Please save as an .eps, .svg or .ai file
  (or .pdf for viewing purposes)

Badge Slots
These slots represent where slots will be die-cut

Badge Outline
This line represents the edge of your badge.

Bleed Line
Any edge-to-edge artwork should stretch all the way to the bleed line.

Safe Zone
This dotted line represents the area that your information should be contained in. Do not place any logos or data past this line.

Bleed (4.25" x 3.25")
Badge edge (4" x 3")
Ad-safe zone (3.75" x 2.75")
